

WarmMark Short-Run Temperature Indicators

- Field-armable with pull tab
- Temperature sensitivity
- Black stripes show product armed
- Brief, moderate, prolonged exposure times

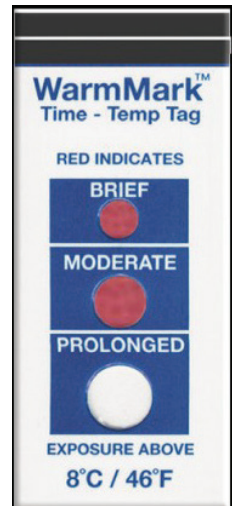

The WarmMark temperature indicators are single-use devices that provide accurate, irreversible evidence of any above-temperature deviation allowing you to make smarter decisions across the cold chain. The WarmMark ascending time-temperature indicator alerts users of exposure to unacceptably high temperature conditions and the cumulative amount of time of the exposure.

Temperature Accuracy	± 1°C
	± 2°F
Storage Conditions	Store in a dry environment below response temperature for optimal shelf life

Part No.	Part No.	Temp Range	Exposure Times		
			Brief	Moderate	Prolonged
84587	WarmMark™ Short-Run Indicator	-18°C / 0°F	1 hour	3 hours	12 hours
85435	WarmMark™ Short-Run Indicator	0°C / 32°F	2 hours	12 hours	48 hours
84589	WarmMark™ Short-Run Indicator	5°C / 41°F	30 minutes	2 hours	8 hours
84507	WarmMark™ Short-Run Indicator	8°C / 46°F	2 hours	12 hours	48 hours
85438	WarmMark™ Short-Run Indicator	10°C / 50°F	2 hours	12 hours	48 hours
84508	WarmMark™ Short-Run Indicator	20°C / 68°F	2 hours	12 hours	48 hours
85443	WarmMark™ Short-Run Indicator	25°C / 77°F	30 minutes	2 hours	8 hours
84540	WarmMark™ Short-Run Indicator	30°C / 86°F	30 minutes	2 hours	8 hours
84590	WarmMark™ Short-Run Indicator	37°C / 99°F	30 minutes	2 hours	8 hours

Before activation

After activation
>12 hours but <48 hours
exposure to temperatures
higher than 8°C
